

Technical Bulletin #10-3250401081

10-325 14" Deluxe Bandsaw

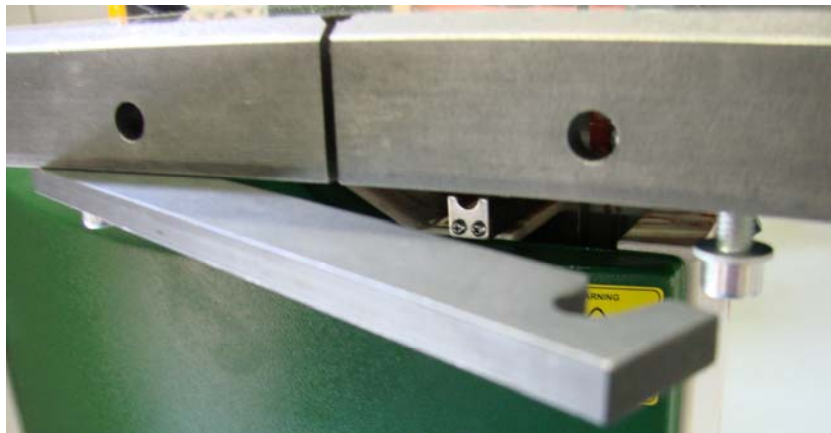

Date: 4/1/2008

Subject: Table Leveling Screw Change

RIKON has improved the 10-325 14" Deluxe Bandsaw. RIKON omitted the table leveling screw and upgraded it with a steel bar to improve the support on the right side of the blade.

The new support bar is preinstalled on the table. The bar must be removed or in the opened position in order to install the table to the trunnion.

RIKON Power Tools sincerely apologizes for any inconvenience that this may have caused.
