Triple Belt Drive

• Sliding Table Carriage

Reduces friction to safely cut full sheets of plywood, make repetitive crosscuts, and make accurate miter cuts from -45° to 45°.

• Crosscut Fence

Crosscut any angle between -45° and 45°; it easily attaches and adjusts without any tools

• Quick Lock Fence

The quick lock fence has replaceable UHMW sides which reduces workpiece friction

• Dado Capacity

Accepts a FULL 29/32" Dado. Largest capacity in the industry.

• Table Insert

Table insert is marked with a blade height reference scale to quickly check blade depth without measuring

• Magnetic Switch

If power is interrupted the Table Saw will not turn on when power is restored. Use the large paddle off button with the bump of the knee.

• Cast Trunnion

The solid cast trunnion system reduces vibration of the blade and adds to the stability of this 667 lb saw

• Segmented Triple Belt Drive System

Reduces vibration and heat build up for improved power performance
