

LED Work Light With Magnetic Base

#12-201

Technical Specifications:

LED Specification: GREE XM-L2
Luminance: 500lm
Bulb Life: 50,000 hrs. Bulb is NOT replaceable.
Batteries Required: 3 - AA or
1 - Lithium 18650 (not supplied)

Approx. Operation Life: AA = 3.5 hrs,
Lithium 18650 = 5.5 hrs
Includes: Magnetic base, magnetic side clip holder, AA and Lithium battery holders, and USB cord.
Certification: CE

Use with 3 AA Batteries:

Put 3pcs AA batteries into the battery holder according to the + - symbols on the ends of the holder. Insert the holder into the light body following the direction arrows on the side of the holder, screw on the end cap, then press the button to switch the light on/off.

Use with 1 Lithium 18650 Battery:

Remove the AA battery holder and install the optional Lithium battery holder. Insert the Lithium battery into the holder with the positive + end facing forward. Screw on the end cap, then press the button to switch the light on/off.

Use with USB Cord & Converter:

Remove all batteries from the holder, and install the empty battery holder back into the light body. Attach the USB cord to the light and 120V electrical outlet to operate.

Focus Adjustment:

The light beam is adjustable from a wide to a small area by sliding the light's front collar. When the light's collar is slid forward, the beam is concentrated for long-distance lighting, or intense lighting at close range. When the light's collar is slid backward, the beam shape is round, for short-distance or a large area of lighting.

Charging:

CAUTION: It is prohibited to use this product to charge 3AA dry batteries. However, this product can charge a 18650 lithium battery directly. With the lithium battery installed in the light's body, insert the charger's USB port into the USB port of the light and connect the charger's plug to the power supply.

This will then charge the lithium battery. Do not overcharge the battery or operate the light with the lithium battery and USB connection for an extended period of time, or damage to the battery and light may result. **NOTE:** The USB cord that is supplied with light requires a 120V plug converter (not included) to operate. This converter is supplied with common cell phones etc..

Side Clip Accessory:

A side clip with magnetic back is supplied for alternative mounting methods of the light on steel products. The clip can function as a storage holder, or can be removed from the light.
